

Omar Alamaldeen

Electrical & Electronics Engineer | Electronics, ELV Systems & Technical Services Specialist

Email: alamaldeen_omar26@outlook.com | Nationality: Turkish | Phone: +971 54 197 6089 | LinkedIn: [Omar Alamaldeen](#)

Summary

Electrical & Electronics Engineering graduate with practical experience in electronics troubleshooting, control system fault diagnosis, ELV systems design, and embedded hardware development. Able to troubleshoot and resolve technical issues across diverse electrical and electronic equipment, with a track record of reducing downtime and improving system reliability. Experienced in the UAE market delivering technical support to end-users and businesses. Well-suited to roles in electronics manufacturing, EV charging infrastructure, ELV systems integration, engineering services, and technical trading companies across the GCC.

CORE COMPETENCIES

Electronics Troubleshooting & Fault Diagnosis | ELV Systems Design (Fire Alarm, CCTV, Access Control, PA) | Control Systems & PLC | Embedded Systems (Arduino, C) | EV Charging Systems | AutoCAD | Revit MEP | Technical Customer Support | Cable Inspection & Compliance | Technical Documentation

Experience

Electrical Engineer – 04/2024 to 10/2024

BADER MOTOR TEKNOLOJİLERİ San. ve Tic. A.Ş., Elazığ, Turkey

- Supported maintenance and troubleshooting of electrical panels for Hydrofor Pump Systems, including diagnosing control circuit faults and coordinating repairs to minimize operational disruptions. These efforts resulted in a 20% reduction in downtime and enhanced overall system reliability. Inspected and tested over 50 electrical panels to verify safety and regulatory compliance prior to deployment, resulting in a reduction of operational risks and improved workplace safety.
- Checked asynchronous motors, diagnosed technical issues with precision, and assisted in identifying faults, helping decrease downtime by 15% and ensuring reliable performance across multiple projects.
- Assisted with documenting, classifying, and tracking more than 100 motors according to system requirements and specifications, streamlining maintenance procedures and enhancing overall asset management efficiency.

Technical Support Assistant – 01/2024 to 03/2026

Move to Excellence, Dubai, UAE

- Provided technical support for electrical equipment, troubleshooting controllers and system issues.
- Delivered rapid problem-solving assistance for over 50 pieces of electrical equipment, resolving controller faults and complex system malfunctions. This minimized downtime by 30%, ensuring continuous operations.
- Reviewed manuals and specifications to diagnose problems and suggest fixes.
- Analyzed technical documentation to pinpoint root causes, enabling effective repairs and upgrades tailored to manufacturer guidelines. Implementing these solutions improved reliability and reduced repeat failures by 20%.
- Verified cable specs and ensured compliance with safety standards for new equipment.
- Conducted comprehensive inspections on cabling for newly installed equipment, guaranteeing alignment with industry safety regulations. This proactive approach prevented hazards and contributed to a safer workplace environment.
- Assisted in assessing motor performance and power usage to enhance efficiency and reliability.
- Supported evaluations of motor function and energy consumption, identifying opportunities for improvements that led to an overall 15% reduction in power costs and increased equipment lifespan.

Professional Projects

Firat University, Elazig, Turkey – 04/2025 to 04/2026

Personal Security Device with GPS Tracking & Alert Features - Graduation Project

- Developed a GPS-based security system with dual-safety features to provide proactive protection.
- Integrated biometric authentication (Fingerprint Sensor) to ensure authorized access and periodic verification.
- Engineered an automated alert mechanism that triggers SMS location sharing via GSM Module and activates loud alarms.
- Utilized Arduino Uno and C-based programming to synchronize real-time data between hardware components.

Electrical Design & BIM Projects

1. Residential Energy Distribution & Street Lighting Design | AutoCAD

- Developed electrical distribution layouts including transformers, feeders, and lighting systems
- Performed load calculations and cable sizing to ensure system efficiency and reliability
- Designed routing for underground and overhead electrical networks

2. Administrative Building ELV Systems Design | AutoCAD

- Designed ELV systems including Fire Alarm, CCTV, and data networks for a multi-story building
- Developed system schematics and cable routing with focus on safety and full coverage
- Integrated access control and public address systems following standard practices

3. Entire House Electrical Design (1-Story Residential) | Revit MEP

- Built a complete 3D electrical model including panels, circuits, and lighting systems
- Applied panel scheduling and one-line diagram development for system documentation
- Coordinated electrical systems within a BIM environment ensuring proper system integration

Skills

Education

Bachelor’s degree in Electrical Electronics Engineering
Firat University, Elazig, Turkey – 06/2018 to 02/2026

Certifications

- Electric Power Systems – University at Buffalo
- Electrical Systems: Panel Boards, FD & Transformers – LinkedIn Learning (PMI® Authorized Training Partner)
- Fire Detection & Fire Alarm Systems and Safety Signages – L&T EduTech – Coursera
- Electrical Systems: Reading Drawings and Schematics – LinkedIn Learning (PMI® Authorized Training Partner)
- Become a PLC Developer – Professional Learning Path – LinkedIn Learning
- The Complete Electrical Low Current Systems Distribution – Udemy
